QA TECHNICAL ENGINEER

Acerca de nuestro cliente:
Software Company,

Descripción:
We are looking for a profile that can communicate with DEV team and QA team. Be able to design and prepare the test environment for launching automated integration tests. Identify security issues on the products and be able to measure the number of concurrent users and size of data that can handle.

* Daily work bridging DEV and QA teams
* Implementation of automated Integration Tests based on Test Plans
* Configuration management of the Test/Preproduction environments
* Review of static / dynamic code analysis reports
* Perform Security Testing in web based applications (Tiger Team)
* Perform Load/Stress Testing using automated solutions
* Implementation of automated Smoke/End-to-End Tests
* Complete assigned tasks on-time and in accordance with the appropriate process
* Regular status reports of testing activities to the QA Director
* Some travel may be required

Perfil buscado (Hombre / Mujer):
- University degree in computer science, or equivalent level
- Must be able to communicate in English
- Spanish knowledge is optional

Successful candidates should have:

- At least 3 years in a similar position in either DEV or QA team
- Experience in multi-platform development (Linux, UNIX, Windows)
- Good Knowledge of Java (J2SE, J2EE)
- Good knowledge of formal testing techniques
- Experience working with open source tools, libraries and products
- Knowledge in at least 4 of the following areas

The following would be an advantage:
- Maven build system

- OWASP Top 10 security issues
- Source Control Management (Subversion, CVS, Hg, Git)
- Code Analysis tools (Sonar, Checkstyle, Findbugs, PMD, CPD)
- Code Coverage tools (Jacoco, Cobertura, Clover)
- Continuous Integration server (Jenkins, Hudson)
- Continuous Delivery / Continuous Deployment environments
- Automation Recording tools (Selenium, Windmill, Watir, FitNess)
- Java Test Libraries / Frameworks (Junit, jwebunit, htmlunit, httpunit, jmeter, jemmy, jbehave, spring-test, mockito, easymock, dbunit)
- Servlet containers (Tomcat, Glassfish, Jetty)
- Databases (Oracle, H2, MySQL, PostgreSQL)
- Issue Tracking Tools (Redmine, Jira, Trac)
- Test Management Tools (TestRail, TestLink)
- Java Profiling tools
- Working with Agile Methodologies (XP, Scrum, Kanban...)
- Knowledge of cryptography: PKI, PKCS
Skills
- Ability to work both alone and as part of a team
- Ability to write technical documentation, reports, business correspondence and procedure manuals
- Good analytical skills with a challenging and enquiring mind
- Good communication skills, organized and motivated, persistent, driven to complete tasks
-Responsible and reliable

Ventajas diversas:
A young and dynamic working environment
Interesting and exciting national and international projects
You will be part of a close intimate team who work very well together
Opportunity to grow on a technical level as well as on a personal level
